

# K 400 NEW

## POLISHING CREAM FOR GRANITES AND PORCELAIN STONEWARE

### DESCRIPTION

K400 NEW is a water based, polishing cream. Specific for the maintenance and restoration of difficult granite surfaces where normally particular machinery, long hours and water are required. Product renews dull and consumed surfaces, scratches and water marks. Application unifies surface aspect, while increasing surface gloss matching results obtained by traditional diamond honing. Product works chemically and mechanically by reacting with the material hardening the natural structure of the stone, closing the surface pores therefore increasing resistance to general foot traffic and surface dirt.

### ADVANTAGES

- Fast & effective
- Economical
- High gloss
- Durable

### WHERE TO APPLY

For internal/external granite surfaces.

### USE

Test on a small area before proceeding, so to ensure product suitability and final result. Apply product to small workable areas at a time. (approx. 2 sqm). Remove all surface debris and previous applied waxes or top coats before applying product. Shake container before using.

Apply a small amount of product to the area to be treated and proceed to buff (175 rpm) using a white nylon pad. Buff until haze is completely gone and natural shine appears on the floor. Repeat operation if required.

Rinse floor with clean water and wet vacuum.

Small corrosions or scratches can be removed manually.

Maintenance: for traditional spray buffing maintenance proceed to use "Neutral crystallizer" as directed
