

SHEILD COMPACT MATT BLACK WALL MOUNTED

Product Description:

The unique technology developed by JVD was built on several processes which, when combined, offer outstanding results and guarantee the device is perfectly harmless.

Those technologies are combined to implement one ultra-filtration sequence and two advanced oxidation sequences. Particulate matter is caught by the HEPA H13 filter and then neutralised before being mineralised via advanced oxidation, which alters the molecules' carbon chain.

The order of those sequences causes the mineralisation of allergens, pollutants and contaminants which then become neutral in terms of CO₂, H₂O, N₂ et O₂, the natural components found in the original pure air.

1 CAPTURES PARTICULATE MATTER

2 NEUTRALIZES

3 MINERALIZES MOLECULES

Art No	:	WHJVUN00005
Materials	:	Anodised aluminium cover
Type	:	Wall mountable
Size (mm)	:	160 x 145 x 125 mm
Purification area	:	up to 20 m ²
Country of Origin	:	UK

Suitable for Offices, Hotel Rooms, Medical Centers, Maternity Wards, Nursery.

Specifications:

Power supply: 100-240 V / 50-60 Hz • Anodised aluminium cover • Capacitive buttons • Purification area: up to 20 m² • Wall mountable • Optional anti-theft system (REF. 2102097) • Cord length: 16 m • Dimensions: 160 x 145 x 125 mm • Weight: 805 grams

SHIELD MATT BLACK (Epoxy Steel Cover - Touch Screen)

Product Description:

PURIFYING AIR, PRESERVING LIFE

Air Origins purifiers serve one single purpose: to restore your air's original purity. How do they do that? By eliminating the odours, allergens, pollutants and contaminants that are detrimental to its quality and to your health.

With their perfect combination of cutting edge technology and a unique design, Air Origins purifiers preserve your interior environment.

Art No	:	WHJVUN00004
Materials	:	Epoxy Steel Cover
Type	:	Touch screen
Size (mm)	:	H. 475 mm x L. 300 mm x D. 300 mm
Area Treated	:	20 to 60 m ²
Country of Origin	:	UK

Benefits:

UNPARALLELED RESULTS FOR YOUR HEALTH

CONTAMINANTS

Protecting the immune system by fighting viruses, bacteria and mould.

POLLUTANTS

Reducing the risk of cancer and endocrine disease by eliminating pollutants.

ODOURS

Eliminating unpleasant odours and restoring the original atmosphere and pure, clean air by eliminating VOC, NOX, SOX and ozone.

ALLERGENS

Eliminating allergens by neutralizing the compounds responsible for allergies.

Specifications:

Voltage / Frequency: 200-240V / 50-60 Hz • Epoxy steel cover • Touch screen • Area treated: 20 to 60 m² • Cable length: 2m • Dimensions: H. 475 x L. 300 x D. 300

A NEW RITUAL FOR A REGAINED PLEASURE

HOW SMOKERS ARE SEEKING A SOLUTION !

Whether it's the lingering scent of stale tobacco permeating the room, clinging to fabrics and clothing, or whether it's the impact on the health of non-smokers, cigar enthusiasts are feeling the pressure to find lasting solutions to support their cause.

"It's truly incredible, there's no smell left!"

Georges Devis, Owner of a guest room in Belgium

I'm a cigar enthusiast, and after a good dinner, it's not uncommon for four of us smokers to gather by the fireplace with good Havanas. Just imagine the smoke! The private lounge adjoins the dining room that we share with the guest room for breakfast. So, we are careful about the odor.

Our Shield® works during the tasting of our good Havanas, and at the end, we activate the boost function twice before letting the air purifier work all night. The next morning, no cold cigar smell. The guests, whom we ask, also don't notice any particular odor! It's truly incredible; they can't believe it when we tell them about our evening.

Moreover, I find it nice for non-smokers to benefit from the filtration of this smoke, which is still quite toxic, during our somewhat "selfish" pleasure."

"How the Shield changed my life"

Aymeric de Vasselot, Partner at O2A Insurance

For several years, I didn't dare to smoke a cigar at home anymore. Even with the window wide open, the smell always ended up lingering and staying. My children complained a bit, and I felt guilty.

Since I discovered the Shield, I allow myself to smoke in my living room during winter, with the windows closed. I have two Shields, a small one and a large one, and I turn them on together or separately depending on the cigar I'm smoking. I leave them in continuous mode while I smoke, and once I finish my cigar, I put them in boost mode once or twice. To completely eliminate the odors, I also leave the Shields® on in continuous mode overnight.

To top it off, the design is really well done. They are pleasant to look at, easy to transport, and easily blend into a living space.

As you can see, I am won over."

PURIFIES THE AIR AFTER YOUR TASTING

Protect yourself and your loved ones

The Shield, a professional air purifier, captures and destroys pollutants generated during your tasting. Indeed, smoking leaves in the air a high concentration of fine particles (PM2.5, PM10), combustion-derived pollutants, as well as molecules responsible for odors. These, perceptible to our noses, can pose a health risk.

The Shield acts quickly to restore air purity after your tasting, effectively eliminating these pollutants. Choose a pollution-free atmosphere thanks to the advanced performance of the Shield.

REDUCES YOUR EXPOSURE TO SMOKE

Without any renovation

Some spaces dedicated to cigars are equipped with air extractors to clear the room of smoke. Unfortunately, the air there is still filled with molecules projected into the air by the smoke.

Thanks to its patented Smart Mineralization technology, the Shield captures AND destroys suspended pollutants, purifying the air.

With its inclined design, imagined by the renowned designer Ramy Fischler, the Shield is an invitation to use. Easy to install (Plug and Play), it integrates harmoniously into the most refined interiors.

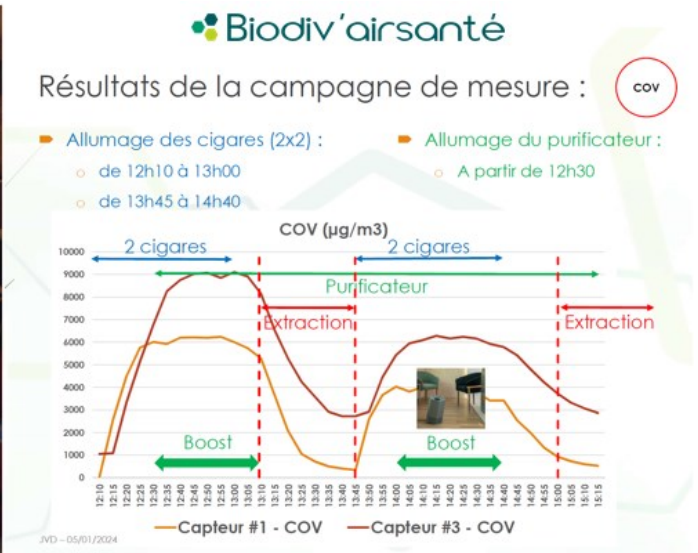

PROVEN PERFORMANCE IN REAL-LIFE CONDITIONS

CAMPAIGN MEASUREMENT

The measurement campaign conducted by the Environmental Health Consulting Firm - Biodiv'airsanté, concluded:

- The **Shield air purifier significantly reduced concentrations of PM2.5 pollutants and VOCs** emitted by lighting cigars.
- The BOOST mode allows for **compensating for the smoke generated by 2 cigars** and thus avoids reaching excessively high levels of indoor pollution.
